
Difference and paired 95% bootstrap interval for JEV and Clef-Flash.
(a) P1: decision model (k = 2) minus CLIP baseline (k = 50; pans: k = 10) (final description; pans: generic)
(b) P2: final minus generic description (both at k = 2; no pans)
(c) P3: k = 2 minus k = 0 references per class (final description; pans: generic)
